Core CS: Data Structures, Algorithms, System Design (basics), OOP, State Management

PROJECTS

Zyntra AI | [GitHub](#) | *React.js, Node.js, Express.js, PostgreSQL, Clerk, Cloudinary, Gemini API, Clipdrop API* April 2026

- Engineered full-stack SaaS platform using React, Express, and PostgreSQL, enabling AI-driven content generation workflows.
- Integrated Gemini, Clipdrop, and Cloudinary APIs, automating content and image generation, reducing manual effort by 80%.
- Implemented Clerk authentication and its subscription, enforcing tiered access control and improving secure user management.
- Developed RESTful APIs with Express and middleware, optimizing AI request handling, improving backend response efficiency.
- Built multi-tenant dashboard with real-time rendering, improving user engagement and tracking personalized content usage.

Resume Builder | [GitHub](#) | *React.js, Redux Toolkit, Node.js, Express.js, MongoDB, OpenAI API* Dec 2025

- Utilized React.js, React Router DOM, Hooks, and component-based architecture to build a dynamic resume builder interface.
- Managed resume data using React state and prop drilling, ensuring real-time form synchronization across multiple sections.
- Implemented state-driven section navigation for multi-step resume forms, reducing navigation complexity by 99%.
- Integrated OpenAI API to generate automated resume summaries, reducing manual writing effort by 90%.
- Managed global application state using Redux Toolkit (slices, actions, selectors), ensuring predictable, scalable state flow.

Postaway-II | [GitHub](#) | *MongoDB, Node.js, Express.js* Sep 2025

- Developed REST API using Node.js, Express.js, and MongoDB & Improved a API scalability by 30% with MVC structure.
- Implemented JWT authentication and OTP-based password reset, securing routes and ensuring reliable session management.
- Developed post, comment, and like modules with ownership validation, enabling secure, efficient CRUD operations for users.
- Built friendship management system supporting send, accept, reject, cancel, and unfriend actions, enhancing social interactions.
- Integrated Multer file uploads, centralized error handling, and logging middleware, improving user performance and experience.
